

High Efficiency Biomass Cogeneration In The Malaysian Industry

28 November at Cititel (MidValley), Kuala Lumpur
29 November at Sunway Butterworth Hotel, Butterworth &
1 December 2005 at King Park Hotel, Tawau.

As part of the COGEN 3 Follow-up Activities under the EAEF (EC-ASEAN Energy Facility) Programme in 2005, we have the pleasure of inviting you to a series of events related to the implementation of biomass cogeneration plants in Malaysia.

These events, supported by the EC, will take place from 28th November to 1st December 2005. They will focus on sharing the results of the performance monitoring of the three Full Scale Demonstration Plants (FSDPs) recently implemented in Malaysia namely the Kilang Beras Titi Serong (rice husk fired cogeneration plant), Guthrie Palm oil mill (palm oil residues-fired cogeneration plant), and the TSH Bio-Energy Sdn. Bhd. (palm oil residues cogeneration plant). During the three seminars, Malaysian investors and European equipment suppliers will explain how these state-of-the-art cogeneration projects were designed and implemented. Except for the seminar in Kuala Lumpur on the 28th November, the event will be followed by a site visit to the three Cogeneration Plant.

Participation in the seminars (limited to 2 participants per organisation/company), site visit, as well as local transportation in Butterworth and Tawau, is free, but registration is required. To register, please complete the attached registration form and return it by e-mail to mohd.fadzil_adnan@sirim.my or to the following fax numbers: 03-55446554 not later than **Wednesday 16th November 2005**.
